No Bail Out for the

Democrat-Republican Duopoly

Support the

Libertarian Party

We believe ...

... the *initiation of force* or fraud for political or social reasons is always *immoral*, and contrary to the principles of legitimate government.

... the guarantor of personal liberty is

economic freedom.

We seek ...

... A Federal Government limited to the powers

specifically enumerated in the U.S.

Constitution.

... Federal, state and local government that does not *manipulate* the economy or interfere in the private moral decisions of any individual.

... A freer and more prosperous society, based

on *respect* for our differences,

acknowledgement of the creative potential of a free market, and *optimism* for the future.
